shower shield

prevents limescale and dirt

for glass, chrome, synthetic materials, aluminium and tiles

250 ml e

HG shower shield

HG "shower shield" protects all materials in and on the shower cabin against limescale and dirt from soap residues, shower gel, skin oils, etc. This product makes the glass in the shower door/ enclosure, the frame, tiles and taps water and dirt resistant, and so ensures that all these materials remain clean and look beautiful much longer. The shower will need to be cleaned less frequently, and cleaning will be much easier. HG "shower shield" is very easy to use and works for months very effectively.

Directions for use: First, thoroughly clean the surfaces to be treated, like tiles, (plexi)glass, chrome, plastic, aluminium and ceramics, and leave to dry. Then apply a small amount of HG "shower shield" to a clean, dry cloth and rub in using overlapping circles. After about

2 minutes, repeat the treatment. Then polish with a clean, dry cloth. For glass surfaces, use a damp cloth and rub to a shine. When using HG "shower shield", the shower will need to be cleaned less frequently, and cleaning will be much easier. Under normal use of your shower cabin or shower, it will be sufficient to use HG "shower shield" once every 3 months.

Attention: Transport and store the bottle upright. Don't apply HG "shower shield" to the floor of your shower cabin, as the increased smoothness of the floor will raise the risk of slipping and falling! • Medical personnel can request the data sheet via +31 (0)36 54 94 777 • The consumer's information sheet can be obtained via www.HG.eu
