## HG stain protector (HG product 15)

HG "stain protector" is suitable for all types of porous and non-porous ceramic tiles, natural stone, as well as concrete and synthetic tiles containing pieces of natural stone, such as granite and marble composite. It protects against virtually all watery (e.g. wine, cola, etc.) and oily stains and dirt. Even the most porous surfaces are protected deep into the pores. That makes it ideal for use in busy areas such as living rooms, kitchens, bathrooms, etc. This product can also be used outdoors.

### Directions:

- 1) First clean ceramic tiles using HG "power cleaner" (polish, wax and dirt remover) (HG product 19), see also the HG floor tile treating matrix on the side of this bottle.
- 2) Natural stone and concrete and synthetic tiles containing pieces of natural stone must first be cleaned using HG "power cleaner" (stripper) (HG product 40).
- 3) Then generously apply this product with a paintbrush or roller.
- 4) If the surface is very porous, a second treatment is recommended, which can be applied about 2 hours after the first.
- 5) The floor can be walked on 3 hours after the last treatment, and is completely protected 12 hours after the final treatment.

### Use:

up to 100 m<sup>2</sup> per litre per layer.

### NB:

Do not use on polished/gloss tiles.

### Maintenance:

All HG tile cleaners that are intended for the relevant surface can be used in combination with this product. See also the HG floor tile treating matrix on the side of this bottle. All HG natural stone cleaners that are intended for the relevant surface can be used in combination with this product.
